Prices stabilised to slightly dearer for all crossbred types at today's South Island sale after the dramatic fall of 2 weeks ago. A superb offering of pre lamb fleece met with some increased competition but exporters were selective.

The highlight of the sale was mid micron types finer than 30 micron. These lifts today are historic as these levels have never been seen ever as long as some of our staff members can remember. Lifts of over \$1.00 to \$1.50 clean brought back memories of the McKinsey report saying there was no future for these types of wool. There is a concern of the pending and ongoing dry conditions in Australia having an impact on volume and quality.
